

Appl. No. 10/537,573  
Amendment dated 11/12/2007  
Reply to Office Action of 08/15/2007

### Amendments to the Claims

1. *(Original)* A process for the preparation of an emulsion of an organo-functional polysiloxane comprising mechanically emulsifying a silanol-functional polysiloxane (I) in water in the absence of any basic or acidic catalyst for silanol polycondensation, adding an organofunctional silane of the formula  $X-A-Si(R)_n(OR')_{3-n}$  (II), where X represents an organic functional group; A represents a divalent organic linkage; each R represents a hydrocarbyl or substituted hydrocarbyl radical; each R' represents hydrogen or an alkyl or acyl group; and n = 0, 1 or 2, to the aqueous phase of the resulting emulsion and reacting the -OR' groups of (II) with the silanol groups of the polysiloxane (I) to form the organo-functional polysiloxane.
2. *(Original)* A process according to Claim 1, wherein the silanol-functional polysiloxane (I) is emulsified in the presence of a non-ionic surfactant.
3. *(Currently amended)* A process according to Claim 1 ~~or Claim 2~~, wherein the silanol-functional polysiloxane (I), at least one surfactant and water are continuously fed to a high shear mixer in such proportions as to form a viscous oil in water emulsion which is continuously withdrawn from the mixer and is diluted before addition of the organofunctional silane (II).
4. *(Currently amended)* A process according to ~~any of Claims 1 to 3~~ wherein the organic functional group X of silane (II) is an amino group.
5. *(Currently amended)* A process according to ~~any of Claims 1 to 4~~ wherein each group R' of silane (II) is a methyl radical.
6. *(Currently amended)* A process according to Claim 5 wherein the organofunctional silane is 3-aminopropyl trimethoxy silane.
7. *(Currently amended)* A process according to ~~any of Claims 1 to 6~~ wherein a cationic surfactant is added to the emulsion no later than the addition of the organofunctional silane (II).
8. *(Currently amended)* A process according to ~~any of Claims 1 to 7~~ wherein a base is added to the emulsion to catalyze the reaction of the -OR' groups of (II) with the silanol groups of the polysiloxane (I).

Appl. No. 10/537,573  
Amendment dated 11/12/2007  
Reply to Office Action of 08/15/2007

9. *(Currently amended)* A process according to ~~any of~~ Claims 1 to 8 wherein the organofunctional silane (II) and the silanol-functional polysiloxane (I) are reacted at a temperature below 40°C.
10. *(Currently amended)* An emulsion of an organo-functional polysiloxane prepared by the process of ~~any of Claims 1 to 9, wherein~~ characterised in that the emulsion contains less than 2% by weight cyclic polysiloxane based on the total weight of polysiloxane in the emulsion.
11. *(New)* An emulsion of an organo-functional polysiloxane prepared by the process of Claim 3 wherein the emulsion contains less than 2% by weight cyclic polysiloxane based on the total weight of polysiloxane in the emulsion.
